ABSTRACT

We are currently in the Fourth Industrial Revolution era. The fourth Industrial Revolution era is closely related to technological developments, especially in the field of digitalization or new media. Changes in people's lifestyles in this era of technological development affect many things, for example how to communicate, seek information, study, shop, buy food, order motorcycle taxis and other life activities that are carried out completely online. Broadly speaking, this turns individuals into people who are lazy to move and want everything to be done with just a touch. On the other hand, the progress of the 4.0 industrial revolution also has a major impact on the progress of the nation and the State, of course, if these changes can be directed towards positive things.

One of the positive values that is indispensable is the inculcation of the Slamet Riyadi's values in each individual. The Slamet Riyadi's value is a form of behavior that reflects a hero character who has extraordinary exemplary, brave, steadfast in his stance and still holds his duties even though his body is injured or there is an opportunity for ease in carrying it out. In this context, changes in people's behavior arise from technological developments, because of the ease of getting something, individuals behave in an instant and create a weak mentality.

By instilling Slamet Riyadi's value in each individual, negative behavior changes from the development of media and technology can still be controlled and directed towards positive things. Cultivating the of Slamet Riyad's Value certainly starts from the individual's awareness to understand and control oneself. Meanwhile, for children, the role of parents is very important to instill the value of religious safety from an early age, so that they can be controlled in following technological developments.

Keywords: Fourth Industrial Revolution, new media and Slamet Riyadi Value

1. INTRODUCTION

1.1 BACKGROUND

The fourth Industrial Revolution era was closely related to technological developments, it changed the pattern of human life, who initially did everything manually, became instantaneous. In the beginning, humans did not easily depend on something that smelled of instantaneous and technology, but now it is the opposite which makes people more motivated to move forward to compete towards modern things.

The very rapid development in the realm of society, for example information technology such as mobile phones, computers that previously could not be operated without using floppy disks and could not be carried anywhere now can be used instantly and can be carried anywhere. The development of this new media can also be seen from changes in the specifications of technology tools and media, both conventional and non-conventional.

Changes in people's lifestyles in the fourth industrial revolution especially in the field of technology affect many things, for example how to communicate with others, look for news or information and how to carry out various activities such as studying, shopping, buying food, ordering motorcycle taxis and other life activities that are carried out completely online, this is unconsciously changing people's behavior, for example being someone who is lazy to move and wants everything to be done with just a touch. On the other hand, the progress of the fourth industrial revolution era also has a major impact on the progress of the nation and the State, of course if these changes can be directed towards positive things.

The Slamet Riyadi's Value which is instilled from an early age will stimulate young souls to rise up, because they feel they belong and reinforce each other's slamet riyadi values, which include: being brave, steadfast in their stance and still holding on to their duties even in any condition. In this context, changes in people's behavior arise from the development of technology that changes manual and courageous behavior into instant behavior, which is not tough and creates a weak mentality.

Responding to this phenomenon, all parties must play a role and instill positive values, in order to be saved from the negative impact of technological developments in the fourth industrial revolution era. Cultivation of religious values or positive values is grown from the self-awareness of each individual, and the role of parents is needed to instill them in children who currently also have a role and participate in the use of media.

1.2 FORMULATION OF THE PROBLEM

From the consideration of the background of the problems that have been described, the problem formulation of this paper is "How important are slamet riyadi values in the Fourth industrial revolution era?"

1.3 RESEARCH PURPOSE

Describe the importance of Slamet Riyadi values for people's behavior in the fourth Industrial Revolution era, in the context of technological development, especially in the field of digitalization or new media.

Providing knowledge about the importance of planting the values of religious safety in each individual, so that they can lead in a positive direction in following technological developments

1.4 BENEFITS OF RESEARCH

This paper is expected to be able to inspire and raise awareness for every individual who is following the technological developments in the fourth industrial revolution era to continue to instill and hold on to positive values, especially the slamet riyadi values to direct change to positive things.

2. LITERATURE RIVIEW

2.1 FOURTH INDUSTRIAL REVOLUTION

The industrial revolution is a major change in various fields, such as agriculture, manufacture, mining, transportation and technology which have an impact on social, economic and cultural conditions in the world. This

revolution led to a massive development in various aspects of life, so that it replaced all aspects of human activities into machines or instantaneous

In the book *A Vocabulary of Culture and Society*, (Raymond Williams) states about a term the word "Industry". The industrial revolution is a big change that is very fast and can easily change the style of human life. The term revolution is usually used in viewing political changes or government systems, however, this industrial revolution is essentially a change in aspects of life from manual to instantaneous or mechanical.

The industrial revolution first occurred in England, several factors that led to the fourth industrial revolution, including:

1. Stable political situation.
2. Wealth of natural resources
3. There are new discoveries that make things easier
4. The prosperity of a country
5. The government provides legal protection for findings, thus encouraging scientific research activities.
6. A large flow of urbanization in the countryside, thus encouraging the government to open up more industries.

This fourth industrial revolution is synonymous with technological developments and digitization, so it can be said to be the era of new media. The proposer stated that the fourth industrial revolution would have many impacts on various fields, including:

1. Service and business models
2. Continuous reliability and productivity
3. IT security
4. Product and effort life cycle
5. Manufacturing industry
6. Industrial value chain
7. Education and work skills
8. Socio-economic factors

Readiness to face the era of the fourth industrial revolution must really be prepared, such as the readiness of Human Resources, natural resources

and the cultivation of positive values to continue to control the use of new media.

2.2 SLAMET RIYADI VALUES

Brigadier General TNI Ignatius Slamet Rijadi is a hero who was born in Surakarta, July 26, 1927. The son of a soldier and fruit seller. He died in Ambon, on 4 November 1950. when he was 23 years old was an Indonesian soldier. Rijadi studied at a Dutch-owned school. However, then Rijadi studied at a seafaring school run by the Japanese and worked for them when the Japanese occupied the Dutch East Indies, after graduating he left the Japanese army and then helped foment the resistance during the occupation.

Rijadi started leading the Indonesian army in Surakarta when the Dutch wanted to re-colonize Indonesia after independence on August 17, 1945. In 1947, starting with a guerrilla campaign, he fought with the Dutch in Ambarawa and Semarang, and was in charge of the 26th Regiment. During the 1st Military Aggression, he succeeded in taking over the power of the city which was taken over by the Dutch. At the end of the revolution in 1950, he was sent to Maluku to carry out the task of fighting the Republic of South Maluku. He was shot dead after traveling across Ambon island at the end of the resistance operation.

He has received many awards after his death. Such as giving a name to a main road in the city of Surakarta, Indonesian Navy frigate, KRI Slamet Riyadi. In addition, in 1961 there were also several posthumous honors awarded to him, and on 9 November 2007, he was declared a National Hero of Indonesia.

From the term his name Slamet Riyadi has a very noble meaning, taken from the word Slamet which means Happy, Prosperous, Always happy, and Perfect. Then Riyadi which means Justice and Holy. Slamet Riyadi comes from Solo, which means that he is someone who has a brave spirit, is steadfast in his stance, is polite and humble.

The Slamet Riyadi's Value can be described as positive values that must be followed, where the form of behavior reflects a hero character who has extraordinary exemplary, namely a brave character, steadfast in his stance

and still holds his duties even though his body is injured or there is an opportunity. ease in running it. Under any circumstances, manners and humility remain inherent in his soul and behavior.

3. RESEARCH METHODS

The method used in writing scientific papers is descriptive research method. This method is a research process that describes existing phenomena, which are taking place today or in the past. In this study, there is no manipulation or alteration of the research variables, but it describes an actual condition. Descriptive research can only describe a state or phenomenon, but it can also describe a state in the stages of its development.

This scientific paper contains research results that describe the current state or phenomenon, namely the development of new media in the fourth Industrial Revolution which has an impact on the slamet riyadi values in this era. The description of the writing of scientific papers is taken from several sources who describe the actual conditions at this time and describe the stages of development of existing phenomena.

4. RESULT AND DISCUSSION

4.1 FOURTH INDUSTRIAL REVOLUTION

Looking at the timeline of several Industrial Revolution from 1.0 to 4.0, now you can see the faces of the post-industrial revolution 4.0, especially new media. The very rapid development in the realm of society, for example information technology such as mobile phones, computers that previously could not be operated without using floppy disks and could not be carried anywhere now can be used instantly and can be carried anywhere. The development of this new media can also be seen from changes in the specifications of technology tools and media, both conventional and non-conventional.

Followed by existing regulations, each individual must be able to control the use of new media in order to be wiser in using the media. Indirectly, the media is a primary need for society. technological regulatory innovation,

which is growing rapidly and rapidly, opens horizons for us in following the Fourth Industrial Revolution, such as changes in lifestyle, thought patterns, actions, cultural perspectives on things. For example, how to communicate with others, look for news or information and how to do various activities such as studying, shopping, buying food, ordering motorcycle taxis and other life activities that are carried out completely online, these things unconsciously change people's behavior, such as being lazy to move. and want everything to be done with just a touch.

Judging from the comparison between the people who use new media or digital media and conventional media today, in fact they can both live and follow the development of information in the fourth Industrial Revolution era but with different media. for people who follow the fourth Industrial Revolution by using digital media they can express, and receive feedback on what they access. whereas for the community using conventional media they can only receive information but they cannot provide feedback and cannot express themselves.

4.2 SLAMET RIYADI VALUES

Slamet Riyadi is a hero from Solo who has struggled to penetrate the wild and repeatedly escaped from the gunfire of the invaders. For months he fought against the invaders for the welfare of the Republic of Indonesia. In his struggle, he still adheres to the principle, namely to keep going even though he is bleeding.

Slamet Riyadi has a very noble meaning, taken from the word Slamet which means Happy, Prosperous, Always happy, and Perfect. Then Riyadi which means Justice and Holy. Slamet Riyadi comes from Solo, which means that he is someone who has a brave spirit, is steadfast in his stance, is polite and humble.

The Slamet Riyadi Values is a form of behavior that reflects a hero character who has extraordinary role models such as a brave character, firm in his stance and still holding on to his duties even though his body is injured or there is an opportunity for ease in carrying it out. Under any

circumstances, manners and humility remain inherent in his soul and behavior.

4.3 IMPORTANCE OF SLAMET RIYADI VALUES IN THE FOURTH INDUSTRIAL REVOLUTION ERA

Most of the people have used the media and technology that emerged in this era. There are people who follow developments starting from technological changes starting from following the development of social media to using all developed media features, but there are also people who only follow the development of information.

From technological developments that have been running and followed by society, creating various changes in the behavior of each individual. This can be seen from the implementation of community life after the fourth industrial revolution. Namely changes in lifestyle, thought patterns, actions, cultural ways of seeing things.

Most of the mindsets and activities carried out by the community, starting from how to express themselves in the media, look for references and information, how to address issues on social media, changes in economic activities have begun to turn into online activities. These changes clearly have a negative impact if they are not directed in a positive direction. Broadly speaking, all activities that are easy to do with just a touch will change the behavior of individuals who are increasingly lazy to move and there is no maximum action to get something.

One of the directions that can bring positive changes in following technological developments is by upholding the slamet riyadi values in each individual. The awareness to instill the slamet riyadi values comes from the willingness of the individual himself to instill positive values and self-control. In addition, the role of parents is also very necessary in instilling the value of religious safety in children, so that they can control their use of media.

5. CONCLUSIONS

The Fourth industrial revolution era is a major change in aspects of life that are synonymous with technological developments and digitization, so it can be said to

be the era of new media. The fourth industrial revolution will have many impacts on various fields, including:

1. Service and business models
2. Continuous reliability and productivity
3. IT security
4. Product and effort life cycle
5. Manufacturing industry
6. Industrial value chain
7. Education and work skills
8. Socio-economic factors

The Slamet Riyadi Values is a form of behavior that reflects a hero character who has extraordinary role models such as a brave character, firm in his stance and still holding on to his duties even though his body is injured or there is an opportunity for ease in carrying it out. Under any circumstances, manners and humility remain inherent in his soul and behavior.

In the Fourth industrial revolution era, awareness in applying the slamet riyadi values is very important. By holding the slamet riyadi values in each individual, changes in behavior in following technological developments will be controlled and can be directed in a positive direction. The ease of accessing and obtaining something in the current era of technological development can easily change people's behavior and mentality. The spirit of being lazy to move will become a culture. By holding and instilling the value of religious sunshine in oneself and children, each individual will be able to control himself in observing the features of technological development.
